

Gripper Pivot Post Kit Instructions

1. (Optional) Wedge open gripper with any available item (2.5 -3.5 inches).

2. Remove current pivot.
 - a. Remove thumb screw and nut.
 - b. Push pivot in and rotate 45° to lock it in the compressed position.

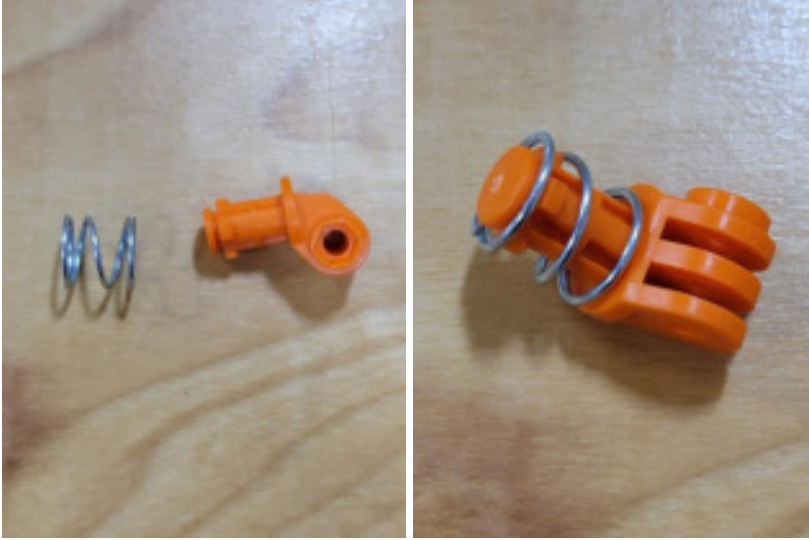

- c. Remove C-clip with small flat blade screw driver.

- d. Turn pivot back to vertical and remove.

3. Install new pivot.
 - a. Place spring over pivot post.

- b. Insert pivot into gripper. Push and rotate to lock it in the compressed position.

- c. Position the C-clip next to the post. Use your thumb to press it into place on the pivot post.

- d. Re-install the thumb screw and nut.
